

Modular plate conveyors

TPM

EASY CLEAN

No dead space structure
hygiene guarantee...

Also available
with a blue belt

Use of the TPM range

The range of STOLZ Modular Plate Conveyors is dedicated to the transfert of fresh or frozen food.

The elevation applications are the most often used, but the Modular Plate Conveyor is a good alternative to replace the rubber or plastic belt conveyors. In fact at each round up, the plates open and provide an efficient cleaning.

Advantages

- 8 basic shapes (from A to H) to select the need.
- Modular design : 4 available widths (300, 450, 600 and 800 mm).
- Every part is from STOLZ standard.
- No fixing on floor required (adjustable cylinders).
- Plastic belt with various boretypes, with or without cross bars, with or without scale borders provided with the material.
