## Autonomous Automatic Screen Selector

### SAGA

The automatic SAGA screen selector is designed to insert one of the sets of screens through data exchange with the production PLC without any manual operation.

The automation at this step significantly reduces production downtimes, improves the production flexibility and ensures a traceability of screens.

Working conditions are improved by limiting risks of accidents and noise exposure.

### FEATURES

- Traceability of screens
- Limited production downtimes
- 2 or 4 sets of available screens
- Improved working conditions

### OPTIONS

- Electrical Box
- Set of safety signs
- Frames with locking flatbar cylinder
- Sets of screens

## ASSETS

The SAGA can be adapted to STOLZ RMP type hammermills from 110 to 116 type. The use of SAGA involves a limited plant downtime.

The SAGA can be fitted into the limited space of an existing grinding unit with manual screen exchange.

The all-electric movement controls provide flexibility, increase safety and power saving.

Above all, it gives you full control of the machine, with remote operation and quick parameter adjustment
